

Enclosures & Patch Panels

APPLICATION

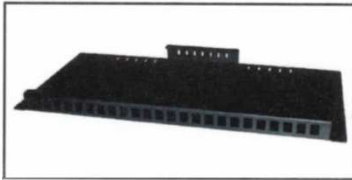

Accessible from the front and rear, these panels are very dense and can be changed out quickly. Our panels can be installed in open relay racks, enclosed cabinets and vendor provided equipment cabinets.

Coupler housings on the front of each coupler panel are color coded allowing you to establish what type of cable needs to be plugged in the front of the patch panel with a glance.

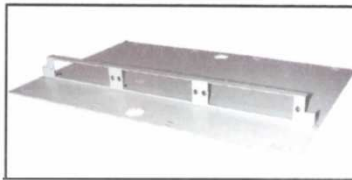

FEATURES

Universal mounting brackets for full compatibility with 19 and 23 inch racks and cabinets. Designation labeling on front and rear doors. Ability to install up to three plates across. Smoked doors and splice trays are available options.

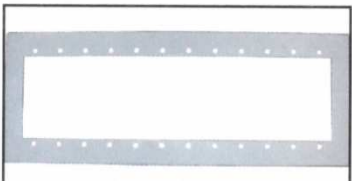

OPTIONS

 Loaded with LC Duplex Adapters – 72 Fibers

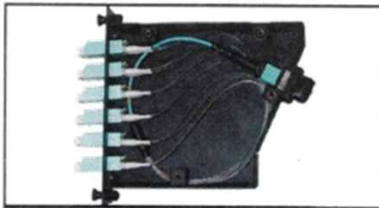

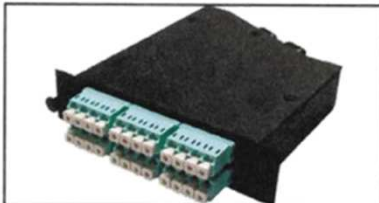

4RU with Fixed Plate
 Loaded with LC Duplex Adapters – 144 Fibers

Snap Pack

APPLICATION

Our LAN Snap Pack is designed to transition or couple modular MTP or MPO style trunk cables to multiple types of standard connector interfaces. The rugged steel enclosure ensures durability while preloaded arrays save you time and money. Custom configurations are available. All assemblies are factory tested guaranteeing maximum performance.

Our Snap Pack comes in two configurations. A single MTP/MPO 12 fiber or a dual MTP/MPO 24 fiber setup. The Snap Packs are preloaded and tested with the adapter loadout of your choice of the front panel.

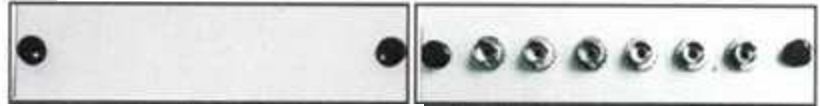

Adapter Options

LC	Up to 24 fiber
ST	Up to 12 fiber
FC	Up to 12 fiber
MT-RJ	Up to 12 fiber
MU	Up to 12 fiber

Adapter Plates

APPLICATION

Our line of plates fit all our fiber wall and rack mount enclosures. Available loaded or unloaded, these plates are for use with FC, LC Simplex, LC Duplex, LC Quad, SC Simplex, MT-RJ, MU and ST adapters.
